PROFESSIONAL PROFILE

I am a self-motivated individual who enjoys taking on a leadership position. I am a fast learner and a creative, critical thinker. I tend to be extremely flexible, and I always welcome environments where I am challenged. I am an excellent collaborator and can confidently say that my calm and composed nature is my predominant attribute. I enjoy working with people and can effortlessly manage conflict. I am neat, well organised, and able to self-manage in a fast-paced environment.

CAREER OBJECTIVE

I am currently a third year B.Sc. Information Technology student studying at North West University, Potchefstroom. I intend to complete my degree by the end of 2020. I am searching for an exacting graduate program that will provide me with an opportunity to master new skills, prove my worth to the industry and gain relevant experience. Therefore, I am searching for a successful company where I can become a part of a dynamic team of employees and make a considerable contribution towards the success of the company.

PROFESSIONAL SKILLS

- Fluent in English and Afrikaans and can type confidently.
- Excellent communication skills both written and oral.
- Able to conduct presentations and facilitation sessions.
- Very diligent and trustworthy worker with sober habits.
- Experience in developing effective working relationships with clients and providing indelible services.
- Excellent interpersonal skills and relevant experience with customer service.

Music, Hiking, Computer Gaming, Squash and Jogging

PROGRAMMING PROFICIENCY

During the course of my 3-year degree in Information Technology, we have worked with the following programming language; **Java, C#, HTML, Python and more specialized languages such as SQL for database development.**

I have a basic proficiency in all the above-mentioned languages, but I have found that I am the most comfortable programming with Java. This is so because my educational program has devoted the most time to learning Java. I am hoping to improve my skillset and gain more experience from a practical work environment with more practice involving "real life" projects that will be required by a company or customer.
